OBJECTIVE

- A passionate and detail-oriented 3D Animator with expertise in Autodesk Maya, blender 3D, and Unreal Engine, seeking to leverage my skills in modeling, animation, and motion graphics to create visually compelling content. With experience in cloth simulation, grooming, and product animations, I aim to contribute my creative and technical expertise to a dynamic team, ensuring high-quality and immersive visual storytelling.
- **Technical Skills:** Autodesk Maya, Houdini, Substance Painter, Adobe After Effects, Adobe Photoshop.
- **Skills and Concepts:** Mudbox, 3ds Max, AutoCAD, and Unreal Engine. Proficient in photography, digital art, video editing, and graphic design, **integrating Artificial Intelligence**.
- **Unreal Engine Certification (In Progress)** – Gaining expertise in real-time 3D creation and interactive experiences, focusing on rendering, simulations, and game development.

□ WORK EXPERIENCE

Technicolor Creative Studio 2022 – 2023

- Cloth Simulation Artist & Short Finalizer Spearheaded intricate cloth simulations, meticulously crafting realistic apparel aligned with production standards.
- Elevated creative projects as a Groom Artist, sculpting and refining hair and fur elements.
- Showcased adeptness in finalizing shorts, harmonizing lighting, texturing, animation, and camera dynamics for a compelling visual narrative.

Hexerve Solution – 3D Artist 2024 -

- Specialize in creating **high-quality models** of products.
- Craft engaging **3D animations**.
- Design detailed and accurate 3D models capturing the essence of products.
- Integrate motion graphics to enhance visual appeal and storytelling.
- Aim to bring products to life, ensuring they stand out and effectively communicate their features and benefits.

Forus Electric Pvt Ltd – Animation Designer 2025 - Present

- Design and deliver **high-quality product animations, 3D visualizations, and motion graphics** to showcase product features and enhance brand communication.
- Utilize **Autodesk Maya, Adobe After Effects, and Photoshop** to create visually compelling and detail-oriented animations aligned with project requirements.
- Innovate by **integrating Artificial Intelligence** in video and image generation workflows, improving efficiency and creative output.
- Collaborate with cross-functional teams to ensure animations effectively communicate technical details and align with the company's vision.

QUALIFICATION

Bachelor in Animation and multimedia
Vishwakarma University, Pune, Maharashtra

JUL 2019 – JUNE 2022
CGPA: 8.0

PROJECTS

Freelance 3D Artist

Analog Radio Model

Designed and modeled a realistic analog radio using Autodesk Maya, focusing on 3D modeling, lighting, and texturing to create a high-quality product visualization. Applied industry-standard techniques to enhance realism, ensuring accurate proportions, material detailing, and professional rendering for commercial and promotional use. [watch](#)

Breakfast table

I created a detailed breakfast table scene in Maya, with plates, cutlery, food items, and textured everything in Substance Painter. Natural lighting highlights the realistic materials, creating an inviting morning ambiance. [Watch](#)

Furniture Product Visualization

Created a detailed 3D furniture model, focusing on high-quality texturing to enhance realism and material accuracy. Utilized Autodesk Maya and industry-standard techniques to achieve a polished, photorealistic finish suitable for product visualization and commercial use. [watch](#)

Personal Work

Classroom

I've turned a typical classroom into a chilling, suspenseful scene with flickering lights casting eerie shadows on overturned desks and broken chalkboards. Unsettling textures and atmospheric lighting evoke abandonment and unease, creating an immersive horror experience. | [Experience](#)

City

Transformed the canvas into a bustling cityscape, skillfully blending 3D modeling, intricate lighting techniques, and expert animation to evoke a nocturnal ambiance. Crafted a captivating city environment in Maya, enhancing realism through sophisticated lighting and meticulous Substance Painter texturing. | [Explore](#)

Fisherman

Brought to life a character with a narrative-rich animated model, seamlessly integrating Maya design, Houdini texturing, and cloth simulation. Merged artistic vision with technical expertise, culminating in a captivating animation that resonates with viewers. | [Witness](#)
